

KNOW THE DIFFERENCE

Do you question whether to visit Urgent Care, the Emergency Room or Retail Clinic?

URGENT CARE CENTERS

offer walk-in care for common, non-life threatening illnesses and injuries. Expect shorter wait times and lower costs.

- Bone fractures that have no obvious need to reset and have not punctured skin
- Gradual onset of symptoms
- Knowledge of diagnosis but primary care physician is unavailable
- Mild asthma
- Minor allergic reactions
- Minor lacerations
- Nausea, vomiting, diarrhea
- Sore throat, cough, cold and flu
- Sprains or strains
- Urinary tract infections
- X-rays

EMERGENCY ROOMS

offer 24-hour care for life- and limb-threatening illnesses and injuries.

- Excessive vomiting
- Fainting or loss of consciousness
- Head or eye injuries
- Heart attacks – chest pain, pain in the left arm or jaw, sudden weakness or dizziness
- Seizures without epilepsy diagnosis
- Serious burns
- Severe bleeding or large open wounds
- Severe pain, especially in the abdomen or halfway down the back
- Shortness of breath, difficulty breathing
- Stroke symptoms– numbness, slurred speech, severe headache, facial weakness
- Vaginal bleeding during pregnancy

RETAIL CLINICS

are located inside select drug stores in your community with no appointment necessary.

- Health screenings and evaluation
- Minor illnesses and injuries
- Skin conditions
- Vaccinations and injections
- Physicals
